

# AST Premmia GL Marketing Information

When you're looking for a solid workhorse computer to reliably get the day-to-day business done, the AST® Premmia GL is a smart solution. The Intel® Celeron™ based Premmia GL is optimized for both price and performance, giving your business core computing productivity for your regular office tasks. When configured for network connectivity with the Microsoft® Windows NT® 4.0 operating system, the AST Premmia GL is an affordable, dependable client solution.

## **Value Priced**

You get more than you pay for with the AST Premmia GL. Although prices are low, reliability and quality are high — allowing you to reduce capital expenditures and increase productivity.

## **Built To Your Requirements**

Our systems are tailored technology for your specific business needs and budget. We offer a full range of Intel Celeron processors, storage and backup devices, connectivity devices, peripherals and software choices with the Premmia GL. Our unique order processing system enables you to customize your system feature-by-feature with full visibility of cost, so you can optimize your investment by purchasing exactly what you want and need.

## **Responsive Performance**

The Premmia GL offers great performance for productivity and small business applications, such as document creation, tax planning and back-end order processing.

## **Smart Network Computing**

Configured as an affordable network client, the Premmia GL brings control and manageability to your business.
